EMPLOYMENT HISTORY

Development Lead, Greater Saskatoon Catholic Schools (GSCS) - Saskatoon, SK | Sep 2024 - Present

- Managed a team of 5 developers, 3 business analysts and vendor resources to lead an on-premise to cloud ERP migration spanning Finance and HR, serving a public-sector organization with a \$186.4M operating budget and over 3,000 employees. Delivered critical capabilities including streamlined payroll, vendor EFT payments, T4 reporting, and financial analytics with a three-year project investment projected to exceed \$1 million.
- Championed the adoption of AI-assisted development tooling (Cursor IDE, MCP server integrations, Rovo AI) across the development team, accelerating feature delivery and embedding AI-driven capabilities directly into ERP workflows.
- Led the implementation of Jira Service Management to replace a legacy helpdesk system. Designed custom workflows and automations, while ensuring seamless migration of historical ticket data for continuity.
- Established Agile & DevOps best practices delivering training sessions on Git, CI/CD pipelines, Docker, and sprint planning to a team of 5 developers, reducing deployment frequency by 25%.
- Designed ETL pipelines and data visualizations using PySpark, Power BI, and Microsoft Fabric, reducing reporting turnaround from 2 - 3 days to 3 - 4 hours.

Full Stack Developer, Framewerx - Edmonton, AB | Sep 2022 - Sep 2024

- Developed and updated web/on-premise application features, including MRP systems, HRMS tools and general-purpose analytics tools for our client: Supreme Steel.
- Developed Swagger/OData API driven web applications allowing for integration to other SAAS products.
- Created XUnit based unit/integration tests ensuring application reliability and a seamless user experience. Contributed to and increase of 80% unit test coverage.

Digital Consultant, Freelance - Edmonton, AB | Oct 2020 - Apr 2022

- Built websites with WordPress and Elementor harnessing its flexibility for effective web solutions.
- Developed web applications using React/Deno/PostgreSQL and WordPress/MySQL stacks, delivering modern full-stack solutions. Implemented key features such as OAuth authentication and SSO.
- Provided consulting and development services to GongCha Western Canada, delivering 2 projects that contributed to a 3 - 4% increase in online orders.

IT Analyst, University of Alberta - Edmonton, AB | Feb 2019 - Jan 2020

- Resolved software and hardware support tickets collaboratively with senior helpdesk personnel.
- Co-developed image deployment automation scripts in Python, reducing manual imaging time from 2 hours to 20 minutes per device and supporting deployment across 500+ machines.
